(a) Accumulations of trash. In areas of business, accumulations of trash shall be placed in suitable receptacles or ~~dumpable~~ metal refuse containers, placed in or near the rear of the business establishment at a place accessible to the employees and trucks of the contractual garbage collector. Boxes shall be broken down and placed in receptacles or containers. In residential areas accumulations of garden or lawn trash shall be placed at or near the street line behind the curb. The material shall be placed in a suitable container, such as plastic bags or garbage cans, in order to facilitate its collection. Tree limbs, hedge trimmings and flattened cardboard boxes have to be either bagged, boxed, bound with twine or secured in bundles. No single item of garden or lawn trash shall exceed four (4) feet in length. Tree trunks and limbs shall not exceed twenty-five (25) pounds in weight. Tree trunks and limbs shall not exceed four (4) inches in diameter. No person shall sweep or throw trash, refuse or garbage into the streets, alleys or sidewalks of the city.

(b) Household hazardous waste, dangerous materials or substances. The contractual garbage collector shall be notified and his assistance requested prior to disposal of any dangerous materials or substances. This includes but is not limited to paint, paint thinners, furniture polish, batteries, pesticides, solvents, stale gasoline, pool chemicals, brake fluid, anti-freeze, engine degreasers, and spot removers.

(c) Deposits of garbage and trash. No person shall deposit garbage or trash upon any vacant or unoccupied premises, in any waterway, pit or pools, or upon the property or premises of another person.

Any items of debris which are left on the public rights-of-way and which are not collected by the contractual garbage collector will be identified by city personnel. Once the items are identified, city personnel will leave a household debris pickup notice, in the form prescribed from time to time by the city manager, posted on the property. The said notice will state the items of debris identified, the cost for removal of each item, and the date after which the city will collect the items and add the charges to the water and sewer bill of the occupant of the property. If the occupant chooses, he or she may dispose of the identified items of debris prior to the date of removal by the city by arranging for transport of the items to a designated transfer station or compost area, as may be appropriate for the type of debris identified. If the identified items of debris are not removed from the public rights-of-way by the date set forth in the notice, the city will arrange for the items to be properly disposed of and the fees as set forth in the notice will be charged to the occupant on the bill received from the city for water, sewer and garbage service.
